

Aerodynamic Food Tanker

Semi Trailer

SIRIUS AEROBODY

The award-winning vehicle features an Aerobody design that encompasses many unique attributes. It ensures safe transport and travel with ATP compliance.

Technical Specifications

28.000 L
Volume Range

3
Compartment

-20 ~ +150 °C
Design Temperature

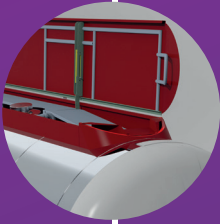

0,5 Bar
Design Pressure

AeroStep

It provides fuel savings with its functional use and aerodynamic design.

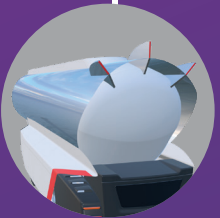

AeroRoof

Increased safety features, automatic control, and complete protection from environmental effects are provided by **AeroRoof**, which also offers an aesthetic appearance.

AeroPlate

With its innovative design, it not only has an aesthetic appearance but also provides low dead weight.

AeroSpoiler

It minimizes airflow and keeps the wind under control.

**AeroStep
Award**

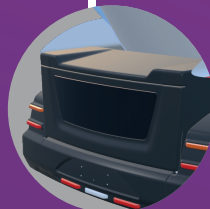

evolution to revolution

AeroSide

The vehicle's front, rear, and side components provide complete protection. It features reduced air resistance and full side protection.

AeroCase

Integrative design with functional use and aesthetic appearance, seamlessly combined with the design.

AeroUnderside

The diffuser located under the vehicle reduces air resistance, resulting in fuel savings.

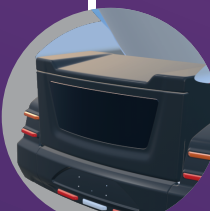

Interactive Info Screen

The large LED screens located at the front and rear of the vehicle can be used for real-time information.

New Gen. Led Lights

The vehicle is equipped with high-quality LED lights that provide a comfortable, glare-free lighting experience.

AeroCase

Integrative design with functional use and aesthetic appearance, seamlessly combined with the design.

AERROAD

AERODYNAMIC ROAD TECHNOLOGIES

Award-Winning Body Design

It provides an aesthetic appearance with its groundbreaking design language, while also ensuring fuel savings.

Innovative Body Structure

The vehicle features a dynamic body structure with 21m^3 capacity. It showcases the art of functional engineering with its efficient and rapid unloading capabilities.

Eco Plus Tires

It has an A-class label rating and a rolling resistance of 4.2 K/KN. It provides A-class noise level, ensuring low noise comfort.

Aluminum Automatic Landing

The entire body of the vehicle stands firmly on the ground with its aluminum automatic parking legs.

Eco CIP System

It provides effective cleaning with less water, ensuring water conservation. The vehicle features an eco-friendly system designed to promote sustainable water use.
